Description

ENDOGYN - DISPOSABLE, STERILE - BOX OF 25

For cytologic endometrial sampling. It allows a painless and easy routine screening of the endometrium avoiding dilation and traction of the uterus neck. An outer sheath covers a mandrel with asymmetrical "V" shaped blades on the top. Each arm features fine toothings and thin cutting edges which are able to remove and keep more endometrial tissue. The head of one of the two arms features a hemispherical head which, when it goes back inside the sheath, allows for previously removed tissue to be aspirated.

Asimmetrical V shape blades tip with protrusions for sampling
External Ø 3.0 mm - Length 20 cm.
Hysterometry can be measured by means of the reference points located at 3, 6 and 9 cm along the shealth
Endometrial sampler for cytologic examination
