Description

TRQ-2024 AUTOMATIC TOURNIQUET - 4 CHANNELS

Tourniquets used to temporarily stop or slow the blood flow in the patient's upper and lower extremities during surgical procedures. In addition, in the application of Regional Intravenous Anesthesia (IVRA), it prevents blood flow to that area after the blood of the extremity is drained. Designed for continuous use in adults and children. Adjustable pressure range is from 20 to 650 mmHg. Tourniquets have 4 connection sockets to use two cuffs. IVRA can be applied with a double cuff. Medical Device Class IIa.

Features:
• Automatic leakage test and system test
• Possibility to use 2 double or 4 single cuffs at the same time
• Safety, visual & audio alarm system
• 7-inch LCD touch screen
• Microprocessor Controlled
• Adjustable application time, pressure range and timing alarm
• Built-in rechargeable lithium-ion battery capacity 20 hours
• 4 tourniquet cuffs included
• Carrying handle
