Description

3M™ NU-GEL™

3M™ code: MNG415
3M™ Nu-Gel™ Hydrogel with Alginate
Minimum order: Box of 10

3M™ Nu-gel™ is a transparent, amorphous hydrogel containing sodium alginate to gently and effectively debride necrotic tissue and fibrinous slough.
It creates a moist wound healing environment which assists with natural autolytic debridement by donating moisture to the wound bed whilst the alginate component enhances its absorptive capabilities.
The gel can also be used to soften and hydrate eschar by facilitating rehydration of the wound.
Longer wear time.
