CND	M04040702
GTIN	04054596951594

Description

3M™ ADAPTIC™ DRESSINGS

3M™ code: TCH501
Product: Adaptic™ Touch - silicone
Size: 7.6x5 cm
Minimum order: Box of 10

3M™ Adaptic™ are primary wound contact dressings.
Pore size is designed to minimize the pooling of fluid at the wound site and enables fluid transfer to a secondary dressing, reducing the risk of maceration.
They minimise adherence and trauma associated with dressing changes, protecting newly-formed tissue and reducing pain.
Ideal for low to high levels of exudate (ulcers, first- and second-degree burns, abrasions…).

3M™ Adaptic™ Touch Dressing is made of soft tack silicone, also suitable for use, under medical supervision, with negative pressure wound therapy (NPWT) for the protection of fragile wound structures.
