Description

GERMOXID WITH alcohol and CHLORHEXIDINE 250 ml - box of 12

Skin disinfectant with bactericidal, fungicidal and virucidal action against encapsulated viruses, designed to help prevent infection or the spread of pathogens on skin. High efficacy for disinfecting hands and skin before and after treating patients or after contact with potentially infected objects. Alcohol and Chlorhexidine guarantee rapid and effective disinfection. The emollient substances make the product more delicate and suitable for frequent use. It is particularly suitable in contexts where hygiene is essential, such as hospitals, medical clinics, intensive care units, to prevent the spread of infections. It can also be used in nursing homes, work environments or private to eliminate germs and bacteria and prevent the spread of cross infections. Italian MOH Registration No. 19.010.

Made in Italy.
