Description

RIESTER RBP-100 B.P. MONITOR - 1742 - WALL

Clinical grade digital blood pressure monitor for fast and reliable readings.
Clinically validated to international standards BHS, ESH, AAMI. Clinically validated for patients with special conditions: hypertension, diabetes, pregnancy, pre-eclampsia, arteriosclerosis, end-stage renal disease, obesity, elderly and children > 3 years of age.
Two measurement modes: auscultatory (manual) and oscillometric (automated).
Auscultatory mode with auto-deflate (3 mmHg/sec) provides consistent patient BP measurement and allows clinicians to verify automated readings without removing the cuff.
Average mode (3x readings) allows for a more objective measurement for clinicians and helps mitigate the risk of elevated readings due to white coat hypertension.
Interval settings in average mode: 15, 30, 45, 60 sec.
It measures BP and pulse range, systolic, diastolic, heart rate and MAP.

- arrythmia detection
- large memory: 210 readings
- display panel with WHO Blood Pressure Value Classification (colour coded)

Supplied with 2.5 m air tube, 2 cuffs made with no natural rubber or latex (M and L-XL), NiMH battery pack, AC/DC adapter (EU, US, UK, Austr.).
Multilingual manual (GB, FR, IT, ES, DE, RU).

Easy to read 4" LCD screen
